Response to Amendment

1. This office action is in response to applicant's amendment received on 11/30/05.
2. Claims 1 - 4 and 21 have been amended. Claims 13-15 have been cancelled. Claims 1 - 12 and 16 - 24 are pending on this application. Claims 1, 7, 12, 16 and 21 are independent claims.

Allowable Subject Matter

3. Claims 1 - 12 and 16 - 24 are allowed.
4. The following is an examiner's statement of reasons for allowance:

With respect to claim 1, the combination as claimed wherein at least the limitation of "performing the command except for the auto-precharge function; initiating a timer in response to the received command; and performing the auto-precharge function for automatically precharging the bank of memory cells responsive to the timer reaching a predetermined value" is not disclosed, suggested, or rendered obvious by the prior art of record.

With respect to claim 7, the combination as claimed wherein at least the limitation of "a precharge control circuit having at least one timer, wherein the precharge control circuit is configured to issue a precharge control signal to the memory cell array responsive to receipt of a command that includes an auto-precharge function a predetermined time after the command is received" is not disclosed, suggested, or rendered obvious by the prior art of record.

With respect to claim 12, the combination as claimed wherein at least the limitation of “performing a read operation responsive to the received read command; delaying initiation of an auto-precharge operation called for by the auto-precharge function until the timer reaches a predetermined time” is not disclosed, suggested, or rendered obvious by the prior art of record.

With respect to claim 16, the combination as claimed wherein at least the limitation of “a precharge control circuit that includes at least one timer that is reset in response to the auto-precharge control signal and that initiates precharging of at least a part of the memory cell array when the at least one timer reaches a predetermined value” is not disclosed, suggested, or rendered obvious by the prior art of record.

With respect to claim 21, the combination as claimed wherein at least the limitation of “a precharge control circuit that includes a plurality of timers corresponding to the plurality of banks, respectively, wherein the timer corresponding to the selected bank is reset in response to the auto-precharge control signal, and controls the bank to be precharged when the timer reaches a predetermined value” is not disclosed, suggested, or rendered obvious by the prior art of record.

5. The prior art made of record and considered pertinent to the applicant's disclosure does not teach or suggest the claimed limitations. McClannahan and Matano, taken individually or in combination, do not teach the claimed invention of performing the auto-precharge function for automatically precharging the bank of memory cells responsive to the timer reaching a predetermined value, in combination with other limitations.

6. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance".

Prior art

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

McClannahan Patent No. US 6,438,670 B1 Date of Patent: Aug. 20, 2002

Matano Patent No. 5,566,119 Date of Patent: Oct. 15, 1996
